

Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #321

New Scrobbler can not connect with Last.fm - error appears in the Windows Audacious Version

July 20, 2013 15:20 - Roland Haslinger

Status:	Closed	Start date:	July 20, 2013
Priority:	Minor	Due date:

Category:	plugins/scrobbler2	Estimated time:	0.00 hour
Target version:	3.4.1		
Affects version:			
Description			
Hi :)			
Have downloaded the latest available Version today from the Audacious Site - Works fine, only the Scrobbler 2 Plugin does not work at all in the Windows Version!			
When i open the Plugin Preferences and click on "Check Permissions" in the Scrobbler 2 Plugin i only get a "network Problem - There was a problem contacting last.fm, please try later" message back.			
But when i use the old Scrobbler Plugin, no problem appears, i can connect with the last.fm Servers and submit my tracks.			
Seems there is some kind of Bug, hopefully it can be fixed!			

History

You chose accidentally the right person... :D
Take a look on "About" of the Scrobbler2 plugin.

#3 - July 21, 2013 09:43 - Luís Picciochi

I think the assignment is automatic.
Can you please run audacious with -V and attach the output?
It should be something like: C:\Program Files\audacious\audacious.exe -V

#4 - July 21, 2013 15:50 - Roland Haslinger

Tried that, but does not work sadly.

#5 - July 28, 2013 22:50 - Luís Picciochi

- File Audacious on Windows.log added

Apparently it works, but for some reason you have to redirect the output to some file in order to see it, sadly.

```
audacious.exe -V > c:\some\dir\where\your\user\has\permission\to\write\output.txt
```

The relevant line is this:

scrobbler_communication.c:151 [send_message_to_lastfm]: Could not communicate with last.fm: Unsupported protocol.

jlindgren: was the curl library compiled with HTTPS support?

#6 - July 28, 2013 23:15 - Luís Picciochi

Related:

<http://stackoverflow.com/questions/197444/building-libcurl-with-ssl-support-on-windows>

Apparently, OpenSSL will also have to be added to the Windows compilation process.

Alternatively, there's a curl binary with SSL support from curl itself, if you want to avoid compiling it and OpenSSL: <http://curl.haxx.se/download.html>

#7 - July 30, 2013 01:15 - John Lindgren

- Assignee changed from Luís Picciochi to John Lindgren

- Target version set to 3.4.1

Duly noted; I will look into this for 3.4.1.

#8 - August 28, 2013 13:31 - Dmitry Viskov

I have the same bug on my Debian system:

```
$ dpkg -s audacious
Package: audacious
...
Architecture: amd64
Version: 3.4-1
```

```
$ dpkg -s audacious-plugins
```

```
Package: audacious-plugins
```

```
...
```

```
Architecture: amd64
```

```
Multi-Arch: same
```

```
Version: 3.4-1
```

```
$ lsb_release -a
```

```
No LSB modules are available.
```

```
Distributor ID: Debian
```

```
Description:   Debian GNU/Linux testing (jessie)
```

```
Release:       testing
```

```
Codename:      jessie
```

```
$ lsb_release -a
```

```
No LSB modules are available.
```

I see the same error message on Ubuntu 13.04 (64-bit), audacious Version: 3.4.1-1~webupd8~raring

#10 - September 09, 2013 18:57 - John Lindgren

This bug is about a missing OpenSSL library in the Windows build. Comments here about anything but the Windows version will be ignored.

#11 - September 14, 2013 23:58 - John Lindgren

- *Status changed from New to Closed*

- *% Done changed from 0 to 100*

I've uploaded a Windows build of 3.4.1 with OpenSSL support. This fixes the "unsupported protocol" error. However, scrobbling is still not working for me on Windows because of [#343](#).
