I'd say those are the icons that are shipped with Audacious:

```

Not a bug. There are no icons in the freedesktop.org naming scheme [1] for "playlist" or "queue", so we have to ship our own.

I believe that the "audio-x-playlist" MIME icon is a good option for the playlist menu.

Not sure about the option for the queue menu now.

audio-x-playlist isn't anywhere to be found in the freedesktop.org spec.
