Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #364

Opus files are missed when opening folder

November 01, 2013 19:40 - jEsuSdA 8)

Status:	Closed		**Start date:**	November 01, 2013
Priority:	Major		**Due date:**	
Assignee:			**% Done:**	100%
Category:	plugins/ffaudio		**Estimated time:**	0.00 hour
Target version:	3.4.3			
Affects version:	3.4.2			

Description

Usually you can add several files recursively to the playlist clicling on open files and selecting a folder. Then Audacious loads the audio files containing in the selected folder and all the subfolders.

But if the folder and subfolder has opus files, these files are not loaded.

If you change the name of files, like song.opus.ogg, then the files are loaded, but if you let the original name, like song.opus, Audacious does not detect them.

Maybe there are some configuration file or some code when the file patterns are indicated (*.mp3, *.ogg, etc.) so you could simply add *.opus or maybe made some extra field on configuration gui to allow add new patterns.

Thanks!
;)

What version of Audacious are you running? This looks like a duplicate of [#362](#362).

#2 - November 03, 2013 20:23 - Michael Schwendt

I wonder whether the ffaudio plugin should list the ".opus" file extension as one it supports?

Maybe, but Audacious should play the files regardless of the file extension.

Audacious 3.4.1 (over Debian)

That is!

If you let the files named as FILE.OPUS, Audacious does not load them. If you rename the same files to FILE.OPUS.OGG or FILE.OPUS.MP4, Audacious load them and play them as Opus files.

There must be a filetype filter on somewhere you can modify to add the .opus extension. ;)

Thanks!

I've just download the 3.4.2 version and compiled it and the bug persists.

The .opus files are not loaded. :(

Please refrain from suggesting solutions until we have identified the problem.

#8 - November 04, 2013 20:10 - John Lindgren

Please attach one of the files that does not play.

Sorry, it was not a solution, it was only a supposition. Maybe my english is not too good and my message appears to be too much imperative. Sorry. Was my fault. I'm spanish and my english is not too good. ;)

#10 - November 04, 2013 21:22 - jEsuSdA 8)

- File messiah_by_handel.opus added

John Lindgren wrote:

> Please attach one of the files that does not play.

Here some of the files Audacious does not load if you select the folder instead the file itself.

Thank you for your efforts. ;)

The file plays fine here in 3.4.2. Please attach the output of "audacious -V messiah_by_handel.opus".

#12 - November 06, 2013 01:29 - Thomas Lange

He says it does not play if you select a folder which contains the opus file.

The output is:

main.c:541 [main]: Startup complete.
probe.c:164 [file_find_decoder]: Probing file:///home/thomas/Desktop/test/messiah_by_handel.opus.
probe.c:120 [probe_by_scheme]: Probing by scheme.
probe.c:134 [probe_by_extension]: Probing by extension.
probe.c:194 [file_find_decoder]: Probe failed.

#13 - November 06, 2013 02:54 - John Lindgren

- Subject changed from Audacious can not opens opus files directly to Opus files are missed when opening folder

- Category set to plugins/ffaudio

Thomas Lange wrote:

> He says it does not play if you select a folder which contains the opus file.

Oh. I missed that distinction. In that case the "opus" extension does need to be added to ffaudio.

#14 - November 07, 2013 02:55 - John Lindgren

- Target version set to 3.4.3

- % Done changed from 0 to 100

- Affects version 3.4.2 added

Thank you!
Great work! ;)
