Target version:			
Affects version:			

Description

I cannot build ffmpeg after this commit:

<https://github.com/audacious-media-player/audacious-plugins/commit/dc9ba260b24f7966ed0ddec52c794ebb04fe6278>

```
ffmpeg-core.c: In function 'close_input_file':
```

```
ffmpeg-core.c:249:5: warning: implicit declaration of function 'avformat_close_input' [-Wimplicit-function-declaration]
```

Arch Linux x86_64
ffmpeg 20111211-1

libavcodec 53.42.0
libavformat 53.24.0
libavutil 51.32.0

History

#1 - January 08, 2012 15:42 - Michał Lipski

Hmm, that's odd. I have ffmpeg 0.9.1:

libavcodec 53.42.4
libavformat 53.24.2
libavutil 51.32.0

EDIT: heh, according to this commit:

<http://git.videolan.org/?p=ffmpeg.git;a=commitdiff;h=60cb07196f0cdd63cf3c98ea8354113af7436adb;hp=c30e59383b0fd958cd45ade28485543589c61a31>

it's available since libavformat 53.24.1

#2 - January 08, 2012 16:09 - Michał Lipski

- Status changed from New to Closed
