Affects version:	3.5		

Description

I'm experiencing random crashes of Audacious during playing network mp3 streams. This bug wasn't present in git version of Nov 16, but it appeared when I updated to latest git version yesterday.

I have attached the stacktrace I see in gdb during the crash.

OS: ArchLinux x86-64 Linux 3.12.2-1-ck

That isn't a stacktrace ...

See if you can isolate it to a specific commit.

Does the latest version still crash?

Otherwise take a look at
