

Audacious - Bug #417

Critical warning when import/export dialog is closed

March 16, 2014 00:17 - Thomas Lange

<b>Status:</b>	Closed	<b>Start date:</b>	March 16, 2014
<b>Priority:</b>	Minor	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	100%
<b>Category:</b>	libaudgui	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	3.5		
<b>Affects version:</b>	3.5-alpha1		
<b>Description</b>			
When the import/export dialog for playlists is closed by clicking <i>"Cancel"</i> , this warning is printed:			
<pre>** (audacious:23202): CRITICAL **: set_str: assertion 'name &amp;&amp; value' failed</pre>			
This happens only if the playlist was not exported before and hence <i>"~/config/audacious/playlist-state"</i> does not contain <i>"filename"</i> .			

History

#1 - March 17, 2014 23:15 - John Lindgren

- Status changed from New to Closed
- % Done changed from 0 to 100
- Affects version 3.5-alpha1 added
- Affects version deleted (3.5)
