<b>Description</b>			
<p>As already explained in this forum conversation: <a href="http://redmine.audacious-media-player.org/boards/2/topics/934">http://redmine.audacious-media-player.org/boards/2/topics/934</a> I would like to request the re-enablement of scrobbling to libre.fm.</p> <p>Since Scrobbler 2 is introduced, we are unable to scrobble to libre.fm anymore, which is also a free software project, so it would be cool if Audacious would continue to support it, as it did before.</p> <p>According to the last post by Luís Picciochi in the forum conversation, it seems like libre.fm also supports 2.0 API, so this should be feasible.</p> <p>Thank you very much!</p>			

#### History

There seems to already exist a patch for this, but I don't know how to compile it. Is it of any use? Could it be integrated officially?

Are there any plans to do this? I have recently been wondering about scrobbling again and currently Audacious seems to be the best music player for me, but this issue stops me. I am not comfortable with Last.FM ToS/privacy policy as they collect more data of me than I think they need such as "other demographic information, such as gender, job information, and postal code."

Everything I could found about Audacious and Libre.FM (nowadays the main instance of GNU FM <https://gnu.io/fm/>) is 5 years old like here, the patch link is broken (ERR\_NAME\_NOT\_RESOLVED) and the same link is at <https://git.gnu.io/foocorp/librefm/wikis/Clientsaudacious>.
