

## Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #460

### [PATCH] fix building of libmms plugin with latest libmms

August 07, 2014 18:21 - Hans de Goede

<b>Status:</b>	Closed	<b>Start date:</b>	August 07, 2014
<b>Priority:</b>	Minor	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	100%
<b>Category:</b>	plugins/mms	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Affects version:</b>	3.5		

#### Description

The latest libmms no longer depends on glib, but the audacious mms plugin code does, so add GLIB CFLAGS / LIBS to the Makefile, rather than depending on MMS\_CFLAGS / LIBS containing the GLIB values too, fixing compilation due to not finding glib.h when using the latest libmms.

#### History

##### #1 - August 07, 2014 21:22 - John Lindgren

- Category set to plugins/mms
- Status changed from New to Closed
- % Done changed from 0 to 100
- Affects version 3.5 added
- Affects version deleted (3.5.2)

Thanks for the patch, but this has already been fixed in 3.5.1:
