#### Description

Hello,  
  
I'm trying to build audacious-plugins 3.6 alpha 1 in an Ubuntu 14.10 (using "--with-ffmpeg=libav --enable-qt") PPA and sndio fails to build with the following error:

```
make[6]: Entering directory '/build/buildd/audacious-plugins-3.5.99/src/sndio-ng'
Compiling sndio.cc (plugin)...
Successfully linked sdlout.so.
make[6]: Leaving directory '/build/buildd/audacious-plugins-3.5.99/src/sdlout'

You can find the complete log here:

[https://launchpadlibrarian.net/192098713/buildlog\\_ubuntu-utopic-amd64.audacious-plugins\\_3.5.99-1~alpha1~webupd8~utopic1\\_FAILEDTOBUILD.txt.gz](https://launchpadlibrarian.net/192098713/buildlog_ubuntu-utopic-amd64.audacious-plugins_3.5.99-1~alpha1~webupd8~utopic1_FAILEDTOBUILD.txt.gz)

(The log file is for 64bit, but this also occurs on 32bit)

#### History

##### #1 - December 08, 2014 21:14 - John Lindgren

I'd suggest disabling sndio on Ubuntu, since it's really meant for OpenBSD.

##### #2 - December 08, 2014 22:09 - Thomas Lange

Is it not possible to check for "SIO\_DEVANY" in configure.ac like here?

<https://github.com/pigoz/mplayer-svn/commit/60d86808e0109e6b6c12365a5102e6240aa124d9#diff-e2d5a00791bce9a01f99bc6fd613a39dR5886>

**#3 - December 08, 2014 22:57 - John Lindgren**

It would be better for RoarAudio to stop pretending that it's sndio when it can't even provide a compatible header. There is a working Linux port of sndio which does work with Audacious; see <http://www.sndio.org/install.html>.

**#4 - December 12, 2014 21:49 - John Lindgren**

- *Status changed from New to Rejected*

I'm going to say RoarAudio isn't supported for now and close the issue. The PulseAudio output plugin should be used on Ubuntu.
