Description			
Hello , All Of You !! I am using audacious as my basic music -player. I am using it customized as my former " Winamp " player back in the good old days ! I see there is no feature for the song name scroll itself in the taskbar , could this feature be added in the next versions ?! (P.S - I am a linux lover !!:)! Deep Thanks !! Radu -

- Status changed from New to Rejected

I've never seen a Linux taskbar that supports this. If one exists, please educate me on how it is done.
