

Audacious - Bug #545

gtk2 build is not displaying some icons

May 26, 2015 16:37 - Michael Schwendt

Status:	Rejected	Start date:	May 26, 2015
Priority:	Minor	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Affects version:	3.6.1		
Description			
Something's wrong with the gtk2 version of Audacious. In WindowManager or Openbox it is failing to display icons such as "go-down" and "go-up", which are not GTK2 stock icon names.			

History

#1 - May 26, 2015 21:12 - Michael Schwendt

D'oh! With Fedora one needs to add package "gnome-icon-theme" to the installation to get the missing icons.

#2 - May 27, 2015 03:46 - John Lindgren

- Status changed from New to Rejected

We try to use only standard names, so most reasonably complete icon themes should work.
