

Audacious - Feature #55

[gtkui] Hide info popup when the entry is deleted from the playlist

January 23, 2012 00:13 - John Lindgren

Status:	Closed	Start date:	January 23, 2012
Priority:	Minor	Due date:	
Assignee:	Michał Lipski	% Done:	0%
Category:	plugins/gtkui	Estimated time:	0.00 hour
Target version:	3.3		
Affects version:	3.3		
Description			
If you hover the mouse over the currently selected entry in the playlist and then delete the entry, the popup remains. I think it should be hidden, and possibly shown after a delay for the next entry, which will now be under the mouse pointer.			

History

- Category set to plugins/gtkui

#2 - February 01, 2012 05:17 - John Lindgren

Another minor problem: Add a single entry to the playlist. Move the mouse pointer over that entry and then immediately over some blank space in the playlist. After a short delay, the popup is shown over that blank space.
