

Audacious - Bug #612

Windows error anytime Audacious is launched

January 08, 2016 11:19 - Rafael Linux User

Status:	Rejected	Start date:	January 08, 2016
Priority:	Major	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Affects version:	3.7.1		

Description

I just downloaded and installed yesterday latest version of Audacious for Windows (Windows 7, in my case). But each time I launch Audacious, it shows an error window, with the title "No disk" and the message "No disk on device. Insert a disk into device \\Device\Harddisk6\DR6" and tree buttons are showed "Cancel", "Retry" and "Continue". I must press "Continue" or "Cancel" to proceed.

It sounds like a problem with your Windows installation. Can you reproduce the problem on another machine?

- Status changed from New to Rejected

#3 - January 18, 2016 11:20 - Rafael Linux User

Ok. In fact, I try to launch the same Audacious version in other Windows 7 and it worked. I forgot to reply here again. I can't understand why, that's the fact.

Thank you
