**Description**

jack-ng.cc needs to include `<iterator>` for GCC 6 compilation:

```c
if g++ -fPIC -DPIC -O2 -g -pipe -Wall -Werror=format-security -Wp,-D_FORTIFY_SOURCE=2 -fexceptions
-fstack-protector-strong --param=ssp-buffer-size=4 -ggrecord-gcc-switches -specs=/usr/lib/rpm/redhat/redhat-hardened-cc1 -m64 -mtune=generic -std=c++0x -std=gnu++11 -ffast-math -Wall -pipe -Wno-deprecated-declarations -Wtype-limits -Woverloaded-virtual -fvisibility=hidden -include config.h -I../../../ -c -o jack-ng.plugin.o jack-ng.cc; then 
  printf "Successfully compiled jack-ng.cc (plugin).\n"; 
else 
  err=$?; printf "Failed to compile jack-ng.cc (plugin)!\n"; exit $err; 
fi
```

```
jack-ng.cc: In member function 'virtual void JACKOutput::close_audio()':
jack-ng.cc:259:42: error: no matching function for call to 'end(jack_port_t* [10])'
  std::fill (m_ports, std::end (m_ports), nullptr);
^   ^
