

Audacious - Bug #63

Spelling error : "ouput" in place of "output"

January 26, 2012 14:18 - Cyril Lavier

Status:	Closed	Start date:	January 26, 2012

Target version:			
Affects version:	3.2		
Description			
Hi. As I continue working on the debian packaging, one of the checks displayed a warning about a spelling error in binaries (also present in .po files). So I added a patch in the debian packaging, which is attached to this issue. In case it's not fixed in the latest snapshot, maybe you can see on integrating this patch. Thanks.

Hi, thanks for reporting.
Patching the po files is the wrong way though
so I corrected the typo in the source file.

Hi Thomas.

Thanks for your reactivity and precision.

I thought source file and the po files needed to be patched.

I will be more accurate next time :).

Thanks.
