Audacious - Bug #630

Loading directory with .cue inside loads files double

March 28, 2016 21:12 - Peter Andrews

Target version:	3.8			
Affects version:	3.7.1			

Description

Helo,

I've just updated Audacious to audacious-3.7.1-1~webupd8~trusty0 (from I think v3.4.3?) and I've noticed one issue...
When I load a directory with File -> Open Files / Add Files (or just drag'n'drop dir) and inside that directory is .cue playlist then files are loaded to Audacious double.
So if there's 10 audio files inside the dir and .cue with 10 files playlist, it will load 20 entries into Audacious.

This issue hasn't been present in previous version I've been using so I figured it's some sort of new version bug.
Please fix it :)

Best Regards!

- Target version set to 3.8

- % Done changed from 0 to 100

Fixed. 3.4.x just ignored the cuesheet completely; that's why you didn't get duplicates before.

Thanks Mr. John ;)
Waiting for that release of 3.8!
