Audacious - Bug #646

audacious crash with cue file and flac or ape

May 18, 2016 02:46 - joaquin murgade

Target version:	3.8		
Affects version:	3.8		

Description

Hello, I have built audacious from the last stable source and from git
When I try to open a folder that contains both a cue sheet and the corresponding flac or ape files
I get a segfault. If I go inside the folder and select the *.cue file it plays fine.
For many years audacious has been my default audio player
Keep the good work !
regards
joaquin

History

- Category set to libaudcore

- Status changed from New to Closed

- Target version set to 3.8

- % Done changed from 0 to 100

Whoops, that was caused by my recent cuesheet improvements in Git master. The stable branch (3.7.x) is not affected.
