

Audacious - Bug #66

UI segfault on spc chiptunes with certain tags

January 31, 2012 22:42 - Will F.

Status:	Closed	Start date:	January 31, 2012
Priority:	Major	Due date:	
Assignee:		% Done:	100%
Category:	plugins/console	Estimated time:	0.00 hour
Target version:	3.2.1		
Affects version:	3.2		

Description

There is a segfault with spc chiptunes when the tags have something specific, I'm not sure what. I have attached an example.

History

#2 - February 01, 2012 05:27 - John Lindgren

- *Category set to plugins/console*
- *Status changed from New to Closed*
- *% Done changed from 0 to 100*
- *Target version set to 3.2.1*
- *Affects version added*
- *Affects version deleted ()*

This was caused by invalid UTF-8 in the tag, which the console plugin should have sanitized. I've fixed this in the console plugin and also added a check in Audacious core to prevent similarly misbehaving plugins from crashing the program in future:
