Affects version:			
Description			
Hi,			
adding a KDE P	lasma icon-only task manager lau	ncher for the Qt interface of Audacious	s is not possible.
The KDE devs s we can map to it		s to install a proper .desktop file and n	nark up the window with correct metadata so
https://bugs.kde	.org/show_bug.cgi?id=375744		
So, could you pl	ease do that?		
Regards

We do install a .desktop file. It is not "missing". If you want the Qt interface to be launched by default, you can edit the .desktop file yourself and make it so.

Not a bug.
