Description Audacious allows to repeat an entire playlist, but it does not allow the same for a single track. It would be nice to have a such feature, at least in the GTK+ and QT interfaces.

Sure it does. Playback -> No Playlist Advance.

Actually, you can even repeat parts of a track with the Repeat Points feature:

- Playback -> Set Repeat Point A to set the starting point
- Playback -> Set Repeat Point B to set the ending point

Ah thanks, I didn't see that.
