

Audacious - Bug #738

Failed to play cue+tak one by one and throw avcodec_send_packet failed

August 10, 2017 11:42 - beats angel

Status:	Rejected	Start date:	August 10, 2017
Priority:	Minor	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Affects version:	3.8.2		
Description			
<p>I just played TAK file with cue playlist. I can only play the first one and then jump to another one. The player threw the message below:</p> <p>WARNING ffaudio-core.cc:186 [tak]: <0x7f650003f740> TAK codec type 0WARNING ffaudio-core.cc:186 [tak]: <0x7f650003f740> is not implemented. Update your FFmpeg version to the newest one from Git. If the problem still occurs, it means that your file has a feature which has not been implemented.</p> <p>ERROR ffaudio-core.cc:215 [log_result]: avcodec_send_packet failed: Not yet implemented in FFmpeg, patches welcome</p> <p>I can play the file with vlc and deadbeef without throwing error, so I think my ffmpeg has nothing wrong.</p> <p>Here is \$ ffmpeg -version</p> <p>ffmpeg version N-82556-g127cc6d Copyright (c) 2000-2016 the FFmpeg developers</p> <p>built with gcc 4.9.2 (Debian 4.9.2-10)</p> <p>configuration:</p> <p>libavutil 55. 40.100 / 55. 40.100</p> <p>libavcodec 57. 66.105 / 57. 66.105</p> <p>libavformat 57. 57.100 / 57. 57.100</p> <p>libavdevice 57. 2.100 / 57. 2.100</p> <p>libavfilter 6. 67.100 / 6. 67.100</p> <p>libswscale 4. 3.101 / 4. 3.101</p> <p>libswresample 2. 4.100 / 2. 4.100</p>			

History

#1 - August 10, 2017 14:40 - John Lindgren

1. Output of audacious -V
2. Example file(s) to reproduce the problem
3. Output of ffplay with the same file(s)

#2 - August 24, 2017 03:28 - John Lindgren

- Status changed from New to Rejected

The error message clearly states this is a problem (or unimplemented feature) in FFmpeg. Closing.
