<b>Affects version:</b>	3.9		
<b>Description</b>			
Open audacious in qt mode: audacious --qt Then try audacious -m			
I managed to fix this problem by using audacious -m --qt && wmctrl -a audacious			
The show-main-window option does not work with the qt version. It DOES work with GTK version on a KDE system though.			
KDE NEON 64bit 5.11.5 KDE Framework Version 5.42.0, QT Version 5.9.3 Audacious 5.9 (stable)
