<b>Target version:</b>			
<b>Affects version:</b>	3.9		
<b>Description</b>			
So pretty much as the title says. I always have to go to Playlist -> Rename or use F2 (which I use anyway). But in the GTK version I know you can double click.			
KDE NEON 64bit 5.11.5 KDE Framework Version 5.42.0, QT Version 5.9.3

With the GTK version a double click on the playlist tab starts playing it. Where do you click to rename it?

#2 - January 24, 2018 02:17 - John Lindgren

- Status changed from New to Rejected

As Thomas says, double-click is not intended to rename the playlist.

#3 - January 24, 2018 05:38 - Raitaro Hikami

Hm... I could swear double click was renaming playlists. But you're right, I tested it in gtk and it doesn't.

I have no idea but I am convinced double click could rename playlists. Sorry for the misinformation. (perhaps renaming files got me confused)
