

## Audacious - Bug #782

### audacious -u on Raspberry Pi

March 30, 2018 15:17 - Ulrich Lauther

<b>Status:</b>	Rejected	<b>Start date:</b>	March 30, 2018
<b>Priority:</b>	Major	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Affects version:</b>	3.6.2		

#### Description

I use  
audacious -H mymusic.mp3 &  
to play mymusic.mp3 and  
audacious -u  
to stop playing.  
This works fine on a Intel(R) Atom(TM) CPU N455

However, on a Raspberry Pi, playing works, but "audacious -u" gives a lot of error messages,  
or - to be exact - warnings, about leaking strings and the music is NOT stopped.

Both computers run Ubuntu 16.4

#### History

##### #1 - April 10, 2018 02:56 - John Lindgren

Are you really using Audacious 3.6.2? That is a pretty old version, and we don't support it any more. I'd suggest trying a newer version to see if you still have the same problem.

##### #2 - June 30, 2018 02:12 - John Lindgren

Closing this report since it applies to an old, unsupported version. Please open a new report if the problem still exists in 3.9.
