

## Audacious - Bug #793

### alarm plugin needs rewrite

May 06, 2018 14:40 - Joe Kamprad

<b>Status:</b>	New	<b>Start date:</b>	May 06, 2018
<b>Priority:</b>	Major	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	plugins/alarm	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Affects version:</b>	3.9		

#### Description

When i enable the alarm plugin it force to enable an alarm, set to the time i do enable the plugin.  
This can be very annoying if you do not remember this (or first time users).  
Alarm should be not be enabled without active setting it.

#### History

##### #1 - June 30, 2018 02:05 - John Lindgren

The current alarm plugin has several serious problems:

- Unsafe use of pthread\_cancel() -- on a thread calling into GTK!
- Heavy use of GTK, which we are moving away from in favor of Qt
- Usability issues such as this one

In a future version we'll probably just remove it. A replacement shouldn't be terribly hard to write.

##### #2 - June 30, 2018 02:07 - John Lindgren

- *Category set to plugins/alarm*
- *Subject changed from alarm plugin (audacious 3.9) enables alarm automatic after enable the lugin to alarm plugin needs rewrite*

##### #3 - June 30, 2018 02:08 - John Lindgren

- *Priority changed from Trivial to Major*
