Audacious - Bug #809

Lots of indicator-sound systemd journal messages

July 18, 2018 16:27 - me 20 hours and

Status:	Rejected	**Start date:**	July 18, 2018
Priority:	Minor	**Due date:**	
Assignee:		**% Done:**	0%
Category:		**Estimated time:**	0.00 hour
Target version:			
Affects version:	3.9		

Description

I'm using audacious 3.9-2 (Audacious 3.9 (Ubuntu package)) on Lubuntu 18.04.
When playing something with audacios, I get this message about four times a second in the systemd journal:
indicator-sound[1336]: Received property Position with type x does not match expected type i in the expected interface
As far as I know, indicator-sound is the volume adjustment in the panel (image in the attachment)
If I play something with vlc, I get this message only one time (not 4 times each second), if I use mpv, avplay or something else, I don't get the message.
I don't know why the message appears, I just recently found it.

I can reproduce this:
open a terminal and run $ journalctl -f
play something with audacious
view the messages appearing in the terminal window

History

'x' (64-bit int) is the correct type. Not a bug.

See:
https://specifications.freedesktop.org/mpris-spec/latest/Player_Interface.html

> Why do I get these messages?

They are messages from indicator-sound. Ask the indicator-sound developers.

#5 - April 29, 2023 22:36 - Thomas Lange

This is not a bug in Audacious.

If anyone is still affected by this:
The bug report below for "indicator-sound-gtk2" contains a proper fix.

https://bugs.launchpad.net/ubuntu/+source/indicator-sound-gtk2/+bug/2016325
