**Audacious - Bug #819**

**Playlist search in Qt5 is really slow on huge playlists**

August 12, 2018 02:13 - Enne Eziarc

**Description**

I've got a playlist with just under 150 thousand entries. In Qt5, each keystroke in the Ctrl+F box freezes the UI for several seconds until the results are whittled down to about 10k or less.

In GTK2 the search is instant, which I can understand for the plain UI (it only does a one-at-a-time search, not the same thing) but it's just as fast in the winamp UI too.

**History**

**#1 - August 14, 2018 14:36 - John Lindgren**

It certainly doesn't seem like it should be that slow, even to filter the entire playlist. When I have some time, I'll run it under Valgrind and try to find out where the bottleneck is.

**#2 - September 05, 2018 03:45 - John Lindgren**

- % Done changed from 0 to 100
- Target version set to 3.10.1
- Status changed from New to Closed
- Category set to plugins/qtui

This change makes a huge improvement (nearly 10x) for me with a playlist of 50,000 entries:

https://github.com/audacious-media-player/audacious-plugins/commit/9d162207ef01c5972e4bb718d390c494f0ad0241

I think that's about as good as it's going to get, so I'll go ahead and close this. If it still seems slow to you, and you have a suggestion for improving it further, I'd be interested.
