Category:	win32		**Estimated time:**	0.00 hour
Target version:				
Affects version:				

Description

hello good morning, is it designed for windows to have some support with ASIO ?, does not have many sound options and some time have had problems with win32 wave out, in Linux works much better

History

#1 - September 27, 2018 15:54 - John Lindgren

- Target version deleted (3.10.1)

- Assignee deleted (Michał Lipski)

#2 - September 27, 2018 16:01 - John Lindgren

- Status changed from New to Rejected

ASIO output is not currently planned. If you have waveOut problems with Audacious **only** and not with other applications, you should post details of your setup on the support forum and see if anyone there can help. If you have problems with other applications as well, this is not the place to ask for help.

I sometimes have problems with the WaveOut, it must be a problem with the Creative drivers, I have a SoundBlasterZ
