### Description

// I'm sure this has been discussed already, too, I'm just writing this because I'm testing right now audacious 3.10 for the first time

I think users (including me) would like to drag songs in the playlists, also to occasionally add them to a new playlist, or to another playlist (as seen in Clementine)

thank you for developing audacious!!

### History

**#1 - September 29, 2018 20:10 - John Lindgren**

This has been possible for years.

**#2 - November 01, 2018 04:49 - John Lindgren**

- % Done changed from 0 to 100
- Target version set to 3.10.1
- Priority changed from Trivial to Major
- Category set to plugins/qtui
- Subject changed from drag songs in playlist and reposition them (an enhancement suggestion) to Playlist drag-and-drop no longer working in 3.10 (Qt UI)
- Tracker changed from Feature to Bug

So, my bad, I checked again and this actually got broken (by me, oops) in 3.10, in the Qt UI. It was working in 3.9.

Fixed: [link](https://github.com/audacious-media-player/audacious-plugins/commit/e7a6c81f4b49872b078368a113854b3461f37b5)

**#3 - November 01, 2018 04:50 - John Lindgren**

- Status changed from New to Closed

**#4 - May 20, 2022 08:31 - David Martin**

Hi,

I'm poking around Audacious 4.1 (Qt UI, KDE, Debian testing) and find myself unable to move songs between playlists. Can it be a regression on this old bug? Should i open a new bug?

Thanks!
