just discovered Audacious (amazing player), but I realized a strange behavior when new files are added to the playlist. If a folder "My Music" is added that contains a folder "Brooklyn", Audacious displays it as the following:

1. "My Music" songs starting with "A" are displayed first
2. "My Music" songs starting with "B" are displayed afterwards
3. "Brooklyn" songs starting with "A" are displayed afterwards
4. "My Music" songs starting with "C" are displayed afterwards

Usually players like Winamp, Foobar etc.., will display logically sorted based on the folder structure:

1. "My Music" songs starting with "A" are displayed first
2. "My Music" songs starting with "B" are displayed afterwards
3. "My Music" songs starting with "C" are displayed afterwards (and all remaining files in "My Music")
4. "Brooklyn" songs starting with "A" are displayed afterwards

All files within a folder are displayed first, then the subfolders files & folders are displayed.

I made a test zip file of you structure above and a screen how Audacious displays it after sorting by filenpath (looks totally weird).

EDIT: Just for some extra information, I checked VLC and it sorts by lexicographical order. So we get this:

1. /Music/*.mp3
2. /Music/Brooklyn/b.mp3
3. /Music/Brooklyn/z.mp3
4. /Music/Brooklyn/X/l.mp3
5. /Music/Charlie/*.mp3

Maybe this last behavior can be obtained just by doing the current comparison between paths case-insensitive.

BTW: Clementine had the same issue ( https://github.com/clementine-player/Clementine/issues/5445 )
