**Description**

... and is confused and will do one of two things

- Be confused and then move onto the next item in list
- Be confused and terminate instance of Audacious

Now I know it can done as Foobar does it flawlessly ie to refresh the paused station and carry on playing said station

It would be a real bonus if Audacious could have that functionality added . Not being a programmer i do not know how easy it is to add but would be very happy to see it put in place

Thanx in advance. Great Program

Best Regards

shan

PS apologies as also put this in Bug / not sure if bug or asking for new feature
