Description

I have a Playlist and some titles are in different folders. If i import a m3u8 playlist, and the songs are in different folders (like pop90s and pop 2000s) Audacious not showing any infos and covers for the songs there are in the different folders. (m3u8 is in pop2000s and songs linked from pop90s no infos) The Songs are playing, but only the infos.

The problem as described doesn't make much sense. There has to be some detail here that is missing.

Can you please provide a complete test case (including the playlist and audio files), exact steps to reproduce, and verify that you can recreate the problem with a clean configuration (backup ~/.config/audacious and then delete it)?

#2 - February 24, 2019 13:42 - John Lindgren

- Status changed from New to Rejected

Closing due to lack of a reproducible test case.
