

Audacious - Bug #87

SID plugin only lists the first track in multi-track SID files

Description			
If you have a multi-track SID file, the SID plugin only seems to list the first one in the playlist. There doesn't seem to be any way of selecting from the different tracks in the file. This seems to happen with all multi-track SID files.

Sorry, to clarify, it only lists the "default" track in the playlist, not the first one in particular

For example, in Noisy Pillars by Jeroen Tel (located in the HVSC), the "default" track is the third one, so Audacious plays the third track.
