Description

On playing a CD I only get code. I want to see the track title, artist and album title.
What settings do I use.
In case an occasional CD has no titles how do I AUTOMATICALLY get the info from the net?

CDDB lookup is enabled by default. If you've somehow disabled it, the setting is here:

Services -> Plugins -> Input -> Audio CD Plugin -> Metadata -> Use CCDB

#2 - August 15, 2019 04:25 - John Lindgren

- Subject changed from How to read the correct track title, album title and artist to How to read CD track info from the Internet
