Audacious - Bug #894

Segfault in new Blur Scope plugin - QT version

July 18, 2019 21:28 - Jim Turner

Status:	Closed		**Start date:**	July 18, 2019
Priority:	Major		**Due date:**	
Assignee:			**% Done:**	100%
Category:	plugins/blur scope		**Estimated time:**	0.00 hour
Target version:				
Affects version:	4.0			

Description

Audacious will crash if running the Blur Scope plugin in either QT or Skins/QT if one clicks the plugin-settings button TWICE: First time works correctly (pops up settings window with "Color" button), then pressing the [Close] button properly closes the popup window. Second time immediately crashes Audacious!

I'm running latist Audacious GIT as/of 07/18. Test machine is running a 32-bit Debian Stretch derivative with QT v5.7.1+dsfg-3+deb9u1.

Steps to reproduce:

1) $>audacious -Q
2) [File].[Settings].[Plugins] (Plugin settings window pops up)
3) [Visualization].[check] Blur Scope
4) Click on "gear" icon: (color window pops up)
5) Click [Close] button on color window
6) Click on "gear" icon again (Audacious crashes with segfault - should pop up color window again).

History

#1 - July 25, 2019 17:22 - Thomas Lange

I could reproduce this easily on Arch Linux with Qt 5.13.0.

What I also noticed:
The color button does not change its background color after selecting one. Does this work for you?

#2 - July 26, 2019 00:03 - Jim Turner

It DOES correctly change the color for me (as long as I don't try to change it AGAIN before properly exiting Audacious).

#3 - July 27, 2019 21:47 - John Lindgren

- % Done changed from 0 to 100

- Status changed from New to Closed

Fixed, thanks for reporting:
https://github.com/audacious-media-player/audacious-plugins/commit/af7119a14bbb17057d396d2d387bd540af0b03a9

#4 - July 28, 2019 00:25 - Jim Turner

Confirmed - That seems to have fixed it here!

Thanks,

Jim
