

Audacious - Feature #899

Album art (cover) as an additional column in Qt version

August 28, 2019 09:59 - acar burak

Status:	New	Start date:	August 28, 2019
Priority:	Minor	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Affects version:			

Description

If it's not a big trouble, please consider adding a column for album art for the forthcoming Qt version. Contrasted with a wall of text, visual clue "helps a lot" especially with a large collection and with classical music.

Please see the screenshot of DeadBeef, the only player having this feature and the only GTK app I keep because of that, otherwise I would use qmmp.

History

#1 - August 28, 2019 10:10 - acar burak

By "otherwise I would use qmmp" I meant "if for not that feature I would use qmmp, I could have replaced deadbeef with qmmp".

#2 - August 28, 2019 10:20 - acar burak

Sorry, obviously it's not just a column, but it is together with the grouping feature, otherwise every track would have cover art next to it cluttering the playlist(s).
