

Audacious - Feature #915

configurable plugin priority

November 13, 2019 20:53 - Ariadne Conill

Status:	Closed	Start date:	November 13, 2019
Priority:	Minor	Due date:

Target version:	4.0		
Affects version:			
Description			
We should make it possible to configure plugin priority somehow.			
Third party plugins (such as vgmstream) would like to prioritize themselves ahead of MPG123 for example (as vgmstream can handle game-specific custom looping and MPG123 does not).			
I'm not sure what the final solution is, but we should talk about making this configurable.			

History

What if we just change the default InputInfo so that the default priority is 5 instead of 0?

And adjust the priority of first-party plugins into the 5-10 range:

flacng, openmpt = 6

vorbis = 7

sndfile = 9 (same as before)

ffaudio = 10 (same as before)

#2 - November 13, 2019 21:20 - Ariadne Conill

Yeah, that was what I was thinking for a first step, but I think users may still want to be able to override our defaults.

#3 - November 19, 2019 01:12 - Ariadne Conill

- Status changed from New to Closed

Done in latest git.

#4 - March 21, 2020 15:20 - John Lindgren

- Target version set to 4.0
