<b>Description</b>			
I just created this account and it required more than twenty recaptchas. That's insane and I'm (rightfully) pissed.			
I am not behind TOR or doing anything special that might have drawn the ire of Google as far as I am aware.

I don't think Redmine supports any captcha other than recaptcha unfortunately :(

This sometimes happens and there's nothing Audacious developer can do.

The bug you experienced is not related to this website/installation.
