

## Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #959

### Window title may state "Buffering ..." erroneously

April 08, 2020 22:19 - Thomas Lange

<b>Status:</b>	Closed	<b>Start date:</b>	April 08, 2020
<b>Priority:</b>	Minor	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	100%
<b>Category:</b>	libaudcore	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	4.0.2		
<b>Affects version:</b>	4.0.1		
<b>Description</b>			
<p>The window title of the Qt interface sometimes shows "Buffering ..." although this is incorrect and the song is already playing for a few seconds. It is not updated again before another song is played.</p> <p>How to reproduce:</p> <ol style="list-style-type: none"><li>1. Stop playback</li><li>2. Restart Audacious</li><li>3. Open multiple audio files (at least three)</li></ol> <p>Result:</p> <p>Initially the window title is set correctly in <code>MainWindow::title_change_cb()</code>, then <code>MainWindow::playback_begin_cb()</code> is called which queues <code>MainWindow::buffering_cb()</code> where the title is overwritten again to "Buffering ...".</p>			

### History

#### #1 - April 09, 2020 03:29 - John Lindgren

The order of the hooks is supposed to be:

1. "playback begin"
2. "playback ready"

And "title change" is not supposed to be called unless the title changes after "playback ready" (which should only happen for streaming).

`MainWindow::title_change_cb()` is connected to "playback ready" and should set the title and cancel the timer for `MainWindow::buffering_cb()`, so that the title is not changed to back to "Buffering ...".

It seems that if all that is implemented correctly, the title should never be "Buffering ..." after the "playback ready" hook. I'm unable to reproduce the issue, so could you check whether the order of events I've described is happening correctly, or where it's going wrong?

#### #2 - April 09, 2020 10:13 - Thomas Lange

- File *ScreenCast.ogv* added

- File *Debug.patch* added

Please see the attached video.

If the title is wrong the order of "playback begin" and "playback ready" is the other way around. Maybe you may have to try it a few times to reproduce this issue. Important is to restart Audacious before opening new songs (for whatever reason).

#3 - April 09, 2020 14:49 - John Lindgren

Okay thanks. I was able to reproduce it after trying again. This should fix it:  
<https://github.com/audacious-media-player/audacious/commit/1ffac65a65f332b04ad40ea33aa2010ac20f851b>

#4 - April 09, 2020 14:50 - John Lindgren

- % Done changed from 0 to 100
- Target version set to 4.0.2
- Status changed from New to Closed
- Category changed from plugins/qtui to libaudcore
