<b>Affects version:</b>	4.0.2		

#### Description

Steps to recreate issue:

Have a playing running.

Click on a track other than currently playing track to change highlighted track.

Hit ESC key to return highlight/cursor to currently playing track

Hold SHIFT and then a navigation key of your choice (Up/Down, Pg Up/Down, Home/End)

What happens:

Selected tracks start from previously clicked on item

What should happen:

Selection should be from the currently playing track you've just given focus with the ESC key.

This only seems to effect making selections with SHIFT.

Thanks for the detailed report! This turned out to be a real pain to fix, due to just how complex list selections are in Qt.

Anyway, please test:
