Audacious - Feature #985

GTK Winamp equalizer "snaps" into the corners of my display. Qt Winamp equalizer does not.

Target version:	4.0.4			
Affects version:	4.0.2			

Description

With the 3.10.1 GTK version of Audacious (on Ubuntu 20.04, for example), with the Winamp Classic Interface, I can detach the equalizer and easily place it in the corner of my display. When the equalizer gets near the corner, it just snaps into place.

With the 4.0.2 Qt version of Audacious (on Void Linux, for example), with the Winamp Classic Interface, I can also detach the equalizer. However, when I try to place the equalizer in the corner of my dispaly, it does not snap into place.

I prefer to be able to quickly snap pieces of the Winamp interface into the corners of my display.

I can provide screenshots if that would be helpful.
