

Audacious - Bug #990

Width of visualizations should be ignored for text ellipsization if they are disabled

May 29, 2020 00:07 - Thomas Lange

Status:	Closed	Start date:	May 29, 2020
Priority:	Minor	Due date:	
Assignee:		% Done:	100%
Category:	plugins/qtui	Estimated time:	0.00 hour
Target version:	4.0.4		
Affects version:	4.0.3		
Description If the visualizations in the info bar are disabled, we should ignore their original width in the calculation for text ellipsization in InfoBar::paintEvent(). This issue only exists with the Qt interface, the GTK interface is not affected. See the attached screenshot.

You have great attention to detail :)

Should be fixed now:
