**Description**

If the visualizations in the info bar are disabled, we should ignore their original width in the calculation for text ellipsization in `InfoBar::paintEvent()`.

This issue only exists with the Qt interface, the GTK interface is not affected.

See the attached screenshot.

### History

**#1 - May 29, 2020 04:37 - John Lindgren**

- % Done changed from 0 to 100
- Status changed from New to Closed

You have great attention to detail :)

Should be fixed now:

https://github.com/audacious-media-player/audacious-plugins/commit/114b669c4db8ab204de2e525ffe568999471bc54

**#2 - May 29, 2020 10:20 - Thomas Lange**

Thanks for the fast fix, John. :)

**#3 - June 01, 2020 17:20 - John Lindgren**

- Target version set to 4.0.4
