

Audacious - Support #997

Revert playlist to original sorted order

June 16, 2020 10:00 - el la

Status:	Rejected	Start date:	June 16, 2020
Priority:	Minor	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Affects version:			
Description			
Add option to revert a playlist to the original sorted order (the same order when drag-and-drop songs to a playlist).			

History

- *Tracker changed from Bug to Support*

Drag-and-drop adds files in order of path. So Playlist -> Sort -> By File Path will restore that ordering.

#2 - June 16, 2020 16:59 - el la

1. What if you don't add songs all at once (pick and choose different songs by drag and drop)?

2. What if you open an existing playlist, and sort according to name. How do you restore the original sorting? You can't unless you reopen the same playlist again.

I think each playlist needs to have a song order property that shows the order of the songs in the playlist (it should be a number).

- *Status changed from New to Rejected*

That would be a form of undo operation, so we'll consider this a duplicate of [#544](#). Feel free to take it and work on it.
