Target version:				
Affects version:				

Description

I was using Alfred to search files for playlist and after digging up found that filenames were numbers. I would like the files to be saved with playlist names. It would help in searching and directly playing the playlist from any searching app.

- Status changed from New to Rejected

The numbered playlists under ~/.config/audacious are not meant to be accessed externally. Use Playlist -> Export Playlist when you want to access a playlist in another application.
